

WORK LIGHTS

Quality Tarp Systems & Trailer Accessories

Thunderstone's high performance LED series work lights provide the optimal amount of light output during late night operation. The Thunderstone work lights can be powered on with a switch or optional multi-function remote. These work lights are impact and all-weather resistant for the toughest conditions.

The work light kit has been engineered for versatility. The work lights utilizes a single RF unit inside a master work light that transmits a signal to additional sidekick lights. With this simple setup a multitude of lights may be added at any-time and operated by one switch or remote.
