

EZ FLOW^{XR}

Hydraulic Trap

The patented EZ Flow^{XR} Hydraulic Trap System™ has been thoroughly tested to meet your tough hauling demands. From field to road there is no hydraulic or electric trap that compares to strength and reliability of the EZ Flow^{XR}.

**Lead times may vary for EZ Flow Kits*

Features

- The operator can stay out of the dust by opening the traps from the cab of the truck, using the multi-function remote.
- Operates using a single 12 volt hydraulic motor
- Hydraulic hoses and stainless steel fittings for increased durability
- No trap operator or motor to interfere with swing auger
- Easily control product flow by feathering the door open and close
- Heavy duty reinforcement brackets for hi-density commodities (Frac Sand)
- Hydraulic motor and reservoir are protected in the apex of the trailer
- Quick release pins
- Simple 3 button remote design with large easy-to-read buttons
- Multi-function remote programs up to 5 trailer accessories
- Easy to install

Standard Remote

Available for Timpte, Wilson & Cornhusker

New EZ Flow^{XR} Override System

EZFLOW^{XR}
Hydraulic Trap

OVERRIDE SYSTEM

In the event of an emergency due to electrical or mechanical issues the EZ Flow^{XR} doors can be easily converted into manual operation. The emergency manual override utilizes quick release pins and straps to open the door. This new override system is not only easy to use, but provides additional ground clearance compared to previous override systems.

Emergency Manual Override Includes

- (2) Pre-Slotted Cross-Shaft
- (2) Straps with Hooks
- (1) Strap Enclosure with Bracket
- (4) Cross-Shaft Mounts
- (4) Composite Bushing with SS Housing Mounting Hardware
